

Alliance for a responsible, plural and united world

World citizens assembly

Lille – December 2-10, 2001

Socioprofessional Group

POLITICAL PERSONALITIES

A rather homogeneous group of participants with a high degree of responsibility : the collegial effect is very clear. There is a good group dynamics : very rich exchanges despite the language barrier.

There is a strong will to participate and discuss, hence a little frustration due to the very directive methods of animation that were proposed. In spite of that, the group accepts the method of the “Post-It” and plays the game.

There are difficulties to catch the notion of committees and particularly the representation committee which is badly understood (to replace with values, knowledge ?)

Result of the Post-It structuring

1 – Representation (values knowledge)

- To head for more equality
- To be more open, more tolerant
- To better share wealth and progress, to show more solidarity
- To have more independent and more ethics-respectful medias

2 – Economics, Society

- To make poverty vanish
- To better manage modernity and the development of the new technologies
- To ensure the effective and free circulation of people, goods and services
- To have a better, more efficient and fairer regulation of the market.

3 – Governance

- To develop and protect local democracy
- To have at our disposal better world-wide regulating systems (more efficient than the present ones., a court, ...)
- To balance the development of regional, national and worldwide democracy
- To protect peace and have it respected (a department of peace, a court...)
- To have companies take part in the world governance

4 – Mankind biosphere

- To better manage natural resources and the refuse
- To educate and make one aware of one's responsibilities about the sharing of natural resources.
- To get the respect of the right to and the equity in the access to resources consumption.
